

PEL Services installs sophisticated Conference Systems for BMA

PEL Services Limited has designed, supplied and installed advanced digital conference systems for the British Medical Association (BMA) at its Edinburgh, Belfast and London premises, skilfully upgrading and integrating with the organisation's existing audio visual teleconferencing equipment where required.

The first major BMA project for PEL was at its Scotland's premises in Edinburgh. The Debating Chamber there is now home to a new state of the art Bosch DCN Discussion System, which can readily accommodate the 72 delegate room capacity.

More than just an audio conferencing system, the DCN is an HD multimedia solution enabling the current speaker to be automatically shown on the four 50" flat panel screens and the HD projector via HD cameras, all of which have been supplied and installed by PEL.

Delegate discussion panels have been fully recessed into the desks by PEL and feature bespoke stainless steel plates for a flush, sleek design. In addition, PEL has installed the DCN system with voting functionality, featuring simple to use software operated on a standard PC.

One of the key factors in the success of this project was PEL's ability to seamlessly integrate the Bosch DCN Discussion System with the BMA's existing audio visual teleconferencing equipment, despite incompatible software. PEL engineers expertly reprogrammed key systems, including a Crestron control system and RADvision teleconferencing system, enabling the BMA to utilise these as well as other older kit cost effectively, whilst benefitting from the latest conference system technology.

The project was undertaken swiftly by PEL Services, who removed the redundant equipment and installed and integrated the new system in just two weeks.

The BMA now benefits from sophisticated conference facilities for its internal events and is able to hire out these facilities to generate revenue.

PEL Services' professional performance at Edinburgh has been recognised by the BMA with further contracts awarded to the company, including a similar project for its Belfast premises and substantial upgrades in London.

For over 35 years PEL Services Limited has been a leading UK systems company designing, supplying, installing and commissioning sound, fire, security & audio visual solutions. In addition PEL provides a range of service agreements including routine maintenance and fully comprehensive cover, on third party equipment as well as PEL systems, throughout the UK and Eire.
