

Hugo Boss appoints PEL Services Ltd

PEL Services Ltd. has been appointed by Hugo Boss to undertake all sound, fire, security and communication systems installation service & maintenance contracts for the entire estate.

This decision comes as a direct result of the excellent service supplied by PEL throughout existing Hugo Boss stores, starting over six years ago with the flagship Sloane Square store.

For Hugo Boss it has allowed for sound, fire, security and communication systems standardisation across all stores from a dependable partner, for both consistency of quality and ease of use by staff moving between stores.

The new arrangement has also led to time and cost savings for Hugo Boss, as PEL Services is able to undertake routine maintenance of all sound, fire, security and communication systems at a single visit.

Systems installed by PEL Services at Hugo Boss stores include fire detection & alarm, access control, CCTV, intruder alarm and top of the range audio visual systems, including the largest High Definition video wall of its type in Europe at Hugo Boss' Westfield Stratford City store. PEL has not only supplied and installed systems in a great number of the retail units at this latest retail complex, but also supplied the largest fire detection linked voice alarm / public address / music system in the UK throughout this impressive shopping centre.

For over 35 years PEL Services Limited has been a leading UK systems company designing, supplying, installing and commissioning sound, fire, security & audio visual solutions. In addition PEL provides a range of service agreements including routine maintenance and fully comprehensive cover, on third party equipment as well as PEL systems, throughout the UK and Eire.
