

PEL provides quality fire detection for the self storage market

PEL Services Ltd., one of the UK's foremost providers of commercial fire, security and communication systems, has completed its fourth fire alarm system contract for Access Self Storage.

One of the largest self storage companies in London, Access Self Storage is also rapidly growing throughout the UK. To protect its new stores and their valuable contents, PEL Services has supplied and commissioned market leading fire detection systems.

Using top of the range equipment in a tried and tested combination provides Access Self Storage with sophisticated detection technology, extensive coverage and ease of use for the ultimate in safety and reliability.

PEL is dedicated to serve the self storage market and offers a wide package of systems to operators, which includes public address and background music.

For over 35 years PEL Services has been a leading UK systems company that designs, supplies, installs, commissions and maintains sound, fire, security & communications systems.
