

## Early Learning Centre Relies on PEL for Fire Safety

As one of the UK's foremost providers of commercial fire, security and communication systems, PEL Services Ltd. has been awarded the fire detection and emergency lighting maintenance contract for 190 Early Learning Centre stores around the UK.

Early Learning Centre opened its first store in the mid 1970s to provide toys that help develop vital skills, making learning fun. Since then the company has gained an enviable reputation for quality and now operates throughout the UK.

PEL Services has been awarded a 'Routine Plus' maintenance contract for the large majority of these stores by Total Store Maintenance (TSM). The contract allows for two visits per annum for each store for routine testing, inspection and preventative maintenance, along with reactive response to remedy malfunctions 24 hours per day, 365 days per year.

Nigel Comery, Managing Director of TSM, has worked with PEL Services over a number of years, with PEL providing maintenance for other stores in the company's portfolio. "PEL is a valued supplier. Historically they have provided high levels of service when it comes to customer interface. They give us solutions, not problems, which I really like. And they're nice people to work with, which always helps! With the Early Learning Centre Stores PEL provide us with a very good maintenance service, as expected."

PEL Services offers a range of service agreements, including routine maintenance and fully comprehensive cover on third party as well as PEL installed systems. It operates nationally throughout the UK and EIRE, supporting markets as diverse as local authorities, public utilities, education, finance, healthcare and retail.
