

Large fire alarm system at 9-storey Uni Building

Users of the prestige University of Liverpool building in London are protected by a substantial fire detection and alarm system.

PEL Services, one of the UK's foremost providers of commercial fire, security and sound systems, has successfully completed a fire alarm installation contract for the University of Liverpool campus in London, as part of a large refurbishment project.

One of the world's leading research institutions and a member of the prestigious Russell Group, the University of Liverpool in London campus is situated at 33 Finsbury Square, right in the heart of London's professional and business community.

Originally constructed in the 1930s and occupying a prominent position on the corner of the Square, the building consists of impressive Grade A space, over nine levels, to accommodate 1,300 students and 100 members of staff.

As part of the £8m refurbishment, the fire detection system at Uni of Liverpool in London was upgraded throughout by PEL Services.

Consisting of two networked four loop panels with a total of 598 devices, PEL installed 110 new devices and repositioned approximately the same number to accommodate the transformation in building usage.

A major project, PEL Services was awarded this contract due to its LPS 1014 accreditation, extensive experience in fire & security and its considerable work in the education sector.

For over 35 years PEL Services Limited has been a leading UK systems company installing and maintaining sound, fire, security & audio visual solutions. PEL provides a range of service agreements including routine maintenance and fully comprehensive cover, on third party equipment as well as PEL systems, designing, supplying, installing and commissioning throughout the UK.
